Date Interface Tool

The Date interface tool displays a calendar for users to specify a date value in an application or macro.
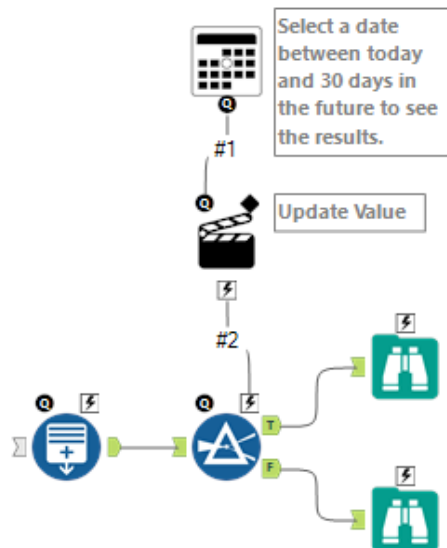

1) Run the workflow as an analytic app.	2) Select a date and run the app to view the results.

Enter the Text or Question to be Displayed

The Date interface tool requires little configuration. In the text box, type instructions to display to the user.

Select a date between today and 30 days in the future to see the results.
